

FAUST-TERMINAL

ATM protection against theft

Faust-Terminal unit, receiver and cards

Installation of Faust-Terminal in ATM
(one of the options)

Elements of Faust-Terminal system

Faust-Terminal is a specialised system that prevents the theft of money from ATMs and the theft of ATMs themselves.

The system resists the following theft attempts:

- thermal and mechanical cutting
- breaking open
- attempt to open an ATM with a skeleton key
- blowing the ATM up
- theft (unsanctioned transportation attempt)

The system uses the following devices to resist the crime:

* Siren with a noise level of 120 dB. At a distance of 1 meter the noise level is higher than the pain threshold.

* White smoke cartridge. White smoke fills the space (up to 60 m³) around the ATM. The smoke is safe for people and doesn't leave marks on the surfaces after dissipation. It can be noticed from big distances and attracts attention to the crime. Smoke won't let the criminal continue the theft, will force him to leave the crime scene.

Additional options:

- Installation of additional signal means. Additional colour smoke cartridge can be installed outside the unit case, inside the ATM, providing exit of the smoke from the machine.
- Sending the signal about the theft attempt to the security;
- Individual settings of the time parameters;
- Manual start of the defense algorithm;
- Special paint can be used to mark the cash during the theft attempt;
- The algorithm can be stopped with a proxy card;
- The size of the unit can be changed to fit different ATM types.

Construction

The casing is made from steel, which protects it from damage.

A battery is installed inside the casing, which provides autonomous operation of the system.

The system is equipped with a tilt and hit sensor.

Installation of additional white smoke cartridge inside the ATM (some exits through ventilation holes)

Information about ZAO “OBERON-ALPHA”

ZAO “OBERON-ALPHA” manufactures and produces:

non-lethal electroshock weapons, means of safe transportation of material values, car smoke alarm systems, ATM alarm systems.

Products are intended for application by:

- **citizens**
- **cash in transit services**
- **car service senters**
- **transport expedition companies**
- **companies, that provide security services**

The company has modern production equipment, is able to produce wholesale quantities of non-lethal weapons and safety systems. ZAO “OBERON-ALPHA” makes researches in security field, constructs reliable products, uses modern and safe technologies und brand components. Due to the high professionalism of its employees the company produces goods that are comparable to the products made by international leaders in this field.
